PERFORMANCE EVALUATION & PROJECT COMPLETION CERTIFICATE

This document certifies that the below-named student has successfully completed the Training Program in Artificial Intelligence and Embedded Systems, organized by the Faculty of Electrical and Electronics Engineering, Ho Chi Minh City University of Technology and Education.

1. STUDENT AND PROGRAM INFORMATION

Student Name: **Le Duc Tri**

Program Duration: June 27, 2025 – September 27, 2025

2. PROGRAM OVERVIEW & SKILLS DEVELOPED

The program provided a rigorous, project-based curriculum integrating theory with real-world applications in AI and robotics. Participants developed foundational skills in:

- Programming & Algorithmic Design: Students learned foundational skills in computational problem-solving, algorithmic design, and data structures using Python.
- Embedded Systems & Computer Vision: The program provided hands-on experience with microcontroller programming, sensor interfacing, and implementing computer vision pipelines with OpenCV.
- Foundational AI Concepts: The curriculum covered essential mathematics for AI, including linear algebra and calculus, along with the fundamentals of machine learning and neural networks.
- Real-Time AI Implementation: Students gained practical experience deploying pre-trained models for real-time inference using TensorFlow.

3. RECOMMENDATION

The faculty confidently recommends this student for admission to university-level STEM programs. Their performance shows high potential for success and contribution to research and innovation.
